1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.
2. The oath or declaration is defective because neither the declaration filed on November 17, 2003, nor the application data sheet filed on July 30, 2003 includes the post office address and residence of Gou-Lin Luo.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Page 1, before the first paragraph, the following has been inserted: -- This application claims benefit of provisional application 60/445,490 filed on February 6, 2003. --

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Liang et al patent (5,292,422) is directed to modules for electrodeionization apparatus. The Li et al patent (6,190,528) is directed to helical electrodeionization apparatus and is described in paragraph [0006] of applicant's specification. The Inoue patent (5,593,560) is

directed to a fluid filtering device. As shown in figure 12, for example, electrical contact is made to a filter element using charging spring 16. The Andelman patent is directed to separation apparatus in which electrical contact is made through graphite rods 12 attached to spring 11. See figure 4B. The DeKock et al patent (6,787,046) is directed to liquid filtration apparatus. Electrical contact is made using terminal plates 60 and 66. See figure 4.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance: Electrodeionization apparatus such as that shown by the Li et al patent and discussed in paragraph [006] of the specification is known. The prior art does not disclose or suggest electrodeionization apparatus which includes an electrode enclosed within an inner side wall of a shell and an electrical contact plate attached along the inner wall, the electrical contact being conductively connected to the electrode to transfer current to the electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William T. Leader whose telephone number is 571-272-1245. The examiner can normally be reached on Mondays-Thursdays and alternate Fridays, 7:30-4:00.
